

Communicable Disease Safety Plan

We want to keep you & your clients safe!

WE NEED YOUR HELP

The nature of our job requires entry into multiple homes each day. Our policies & procedures aim to eliminate cross contamination from our staff & between homes. We encourage you to share this information with your sellers & any residents of the home.

Please Note: Our technicians have the right to leave the property and cancel the appointment if anyone present is showing signs of illness or if there is a lack of adherence to our masks & social distancing safety plan (below).

EMPLOYEE HEALTH MONITORING

Employees are instructed to stay home if they are exhibiting any symptoms of a communicable disease or if they have been directed to by provincial guidelines or a public health order.

MASKS & SOCIAL DISTANCING

Our technicians will continue wearing cloth masks (or similar protective face coverings) while working within your clients home.

Clients, sellers and other service providers are welcome to be inside the property during our visit however please maintain a distance of at least 2 metres OR wear a mask that covers your mouth & nose until we have vacated the property.

PREPARING FOR OUR VISIT

To avoid touching as much as possible, we ask that the home be "show ready". Our technicians are not stagers or cleaners but will move small items that look out of place if it will yield a better result. We carry gloves & alcohol sanitizer spray which will be used to clean contact surfaces as needed. Please consider: turning on all the lights, setting the blinds as you'd like, & opening all the doors prior to our arrival.

You can check our [client resources](#) page for additional tips on how to prepare for photography, vr tours or aerial video.

Let's work together to stay healthy
